ABOUT MENU® PUBLISHING

Since 1979, MENU® has been building a database of information about software for microcomputers and publishing this information in directories and special-interest books. The information is also available on disk, through on-line services such as DIALOG®, AppleLink®, PC Link and America On-line, and will soon be available on CD-ROM.

As the premiere software information broker, MENU® is dedicated to helping consumers make educated software – buying decisions. Each MENU® book is researched for accuracy and includes helpful indexes.

HOW TO USE THIS DIRECTORY

In each directory ...

We list vital information for thousands of software packages. This includes the publisher name, system information, medium and memory, brief description, ISPN® and retail price.

Find what you need fast ...

MENU® directories are easy to use. We've grouped software listings into 140 subject categories, and we've included three indexes to help you quickly locate a particular subject, package or publisher. The Publisher Directory includes the software publishers' address, phone, fax and telex numbers.

MENU's numbering system ...

International Standard Program Numbers (ISPN®'s) are issued by MENU Publishing and provide a standard numbering system that uniquely identifies individual software programs and their publishers.

Special requirements ...

Some software is available in lab packs or school versions, or may have special requirements. You'll find this information in the "Requires" section of each listing.

To arrange a purchase ...

Use the Publisher Directory to locate a publisher's phone number — and then call! Or, call your favorite software store.

NOTE: If **Medium** reads **3½-inch and 5¼-inch,** the package includes disks of both sizes. If **medium** reads $\begin{smallmatrix}\textbf{3½-inch}\\ \textbf{5¼-inch}\end{smallmatrix}$ you must request the appropriate size.

Need more detailed product information?

Call MENU at (412) 746-MENU. For $3.50 per program description, we will send you a detailed summary of a product's features. These ISPN® Prints will give you the additional information you need to make smart purchasing decisions.

If you have any questions ...

Please call us at (412) 746-6368 and ask for Information Management when you have any questions about the information in this directory. We will be happy to help you and would like to hear any feedback you might have on our publications.
